Check back often for new additions! For Sale: First Production Challengers U / L a new QCU produces Challenger kit cars Airplanes for almost 35 years with the majority to be flown as Ultralight. For the 30 Å ° Anniversary of FAA Part 103 (Ultralight), QCU has decided to produce a CH IU / L kit that could be constructed to completely adhere to the part 103. what is offered here is the first production model of that kit. The kit was quality tailored to aviation adventure and has a coat of paint and canvas wings for sails Stewart Ultralight systems work. The dashboard is a unit fold down individually built by Adventure Aviation and is equipped with ASI, ALT and a Grand Rapids E.I.S. It features pedal is dropped for a driving position more comfortable and is equipped with hydraulic disc brakes Black Max and wheels with new tires tubeless polished. The lifting struts and the main undercarriage legs were polished by hand and sealed with Stewart Evershield systems. The aircraft now has a rebuilt Rotax 377 but when fitted with a Hirth F 33, meets all the requirements 103. The aircraft was HIRTH F-33 equipped to demonstrate compliance. The 377 was rebuilt by Adventure Aviation. It has a new upper revision with all new seals. The suction and unloading that carry in the cylinders, fan, seals and intake and unloading collectors were all polished due to airflow without obstacles. The cylinders and pistons are within factory specifications. It has all the new ROTAX rings, wrist pins and 503 piston bearings without a cage. The crank has been inspected and certified within factory specifications from AirScrew Performance. The crank bearings have been replaced with factory OEM bearings and the motor reassembled using all new crank gaskets. It has new points and BOSCH capacitors, new 7mm copper plug threads correct at the factory using JBM boots. It has new NGK Resistor caps and new NGK spark plugs. The carb has a binge bing 54 carb and equipped with all new jets and correct needle 377. Carb is equipped with a new high-flow k & n air filter and a jbm carb boot. The engine is equipped with Hegar Drive with all new factory OEM bearings and transmission belt. The prop is a new 54å ¢, three blades, adjustable land Powerfin. The complete exhaust system, the fans and the recoil boot housing have all been covered in silver ceramic. This plane can be sold with the current 377, a new HIRTH F-33 or no engine. I am asking for \$ 12,000 in its current configuration with available delivery. Aerolite 103The Aerolite 103 was born in 1996 by Designer Terry Raber, Ohio. Terry believed that many different models of ultralights incorporated great design features, but none of them combined all those features in a single aircraft. Then he decided to design the last ultralight of part 103. As the aerolite took the flight and was perfected, it was very well received in the sector, winning Grand Champion Ultralight in Oshkosh in 1997, and several other awards later What. From 1997 to 2012 Terry produced hundreds of Aerolite 103. Although the aircraft performed wonderfully and it was very popular, Terry was unable to keep up with the production and customer support needed with that volume of production. In 2012 U-Fly-it LLC of Deland, Florida acquired aerolite production rights 103, and moved production to Florida. U-Fly-it, already well consolidated in the ultra-light and light sporting aircraft industry, it was able to organize production to meet market demand for Aerolite 103 in the United States, as well as the development of a Flourishing export market. Now, once again, Aerolite 103 is an important player in the ultralight market part 103. Aerolite 103 probably has the best general performances of any true 103 ultralight part. Easily the weight with a 28 hp engine, and also with features rarely present on real ultralights as an electric start, electric shoes and brakes. Alzery a heavy pilot in the sky with ease. With a nose cone and windshield is very convenient to fly, even in fresh time, but keeping the joy of flying to low and slow rooster, open. With adequate clothing it can also be taken all year round even in colder climates. Aerolite uses a control yoke rather than a stick that distinguishes it from most other ultralights. Aerolite is very easy to enter and go out, even for people with physical difficulties. It is also very stable and easy to fly by training or fast and easy transition. Airframe is very durable and low maintenance. The Aerolite 103 is also very convenient. Since it is a legal ultralight, it is delivered completely assembled, ready to fly. Different engines can be used with aerolite 103, including the HIRTH F33, F23, the Kawasaki 340 and 440, and the Rotax 377, 447 and 503. (Some motors can put it over the weight for part 103) Below is a list of manufacturers referring to have a kit or plans that can satisfy The requirements of Part 103 as an ultra-light vehicle. Attention must be taken to verify the statements of the manufacturer on the compliance of Part 103. Manufacturers can claim the compliance of part 103, however you are L'operatore deve essere in grado di dimostrare alla FAA soddisfa i requisiti della part 103. Å Sebbene EAA abbia cercato di elencare tutti i produttori, potrebbero esserci altri progetti disponibili che potrebbero soddisfare la parte 103 che non sono in questa list.
